'advanced water conservation'

As the world's environmental resources are starting to diminish, Imperial Ware have developed technology to assist water conservation.

The new EVO System® developed by Imperial Ware is environmentally conscious technology specifically designed to save water and save money.

Choose Imperial Ware EVO® products for a dual flushing system using only 4.5 litres of water for a full flush and 3 litres for a half flush without compromising performance.

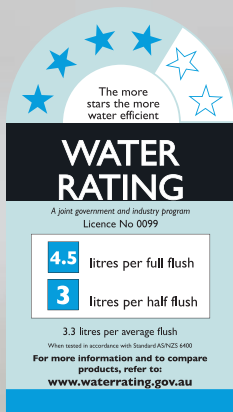

The EVO System® is rated ★★★★★ under the federal governments' (WELS) Water Efficiency Labelling Scheme.

All Imperial Ware™ EVO® products feature this mark.

WELS standards label
